

TRAN XUAN DAN

GAME DEVELOPER

CERTIFICATE

UNITY GAME PROGRAMMING - ITPLUS (2020)

Graduated with honors from the Game Programming course at IT Plus Academy, Hanoi (2020).

ACADEMIC BACKGROUND

INFORMATION SECURITY

10/2016 - 10/2021

Posts and Telecommunications Institute of Technology

- Studied fundamental computer science concepts.
- Learned the basics of programming in various languages.
- Specialized in cybersecurity and information protection.

INTRODUCTION

I have around 5 years of experience in game programming, particularly in developing casual, hybrid-casual, NFT, and gambling games. I've worked with a wide range of engines including Unity, Unreal, Cocos, and Godot.

I enjoy exploring new technologies and techniques in game development, and I'm seeking a dynamic, forward-thinking environment where I can continue to grow and contribute meaningfully.

WORK EXPERIENCE

GAME DEVELOPER - ONSITE AND REMOTE 03/2024 - 02/2025

Onsite and Freelancer

- **Inwave Studio - Onsite:** Used Unity to upgrade old features, programmed new hybrid-casual features, upgraded SDKs, integrated new ad networks and SDKs, and optimized performance for *Dancing Road*.
- **Vietnam casino game - Remote:** Used Cocos Creator 2.4.5 and TypeScript to fix UI bugs and game flow issues.

GAME DEVELOPER - FREELANCER 10/2023 - 03/2024

Freelancer

- **AIRSPEDER - Remote:** Used Unreal Engine 5 to develop an NFT airplane racing game in direct collaboration with an Australian client. Integrated Hyperplay for crypto wallet login and handled smart contract ABIs.
- **GOLF GAME - Onsite and Remote:** Used Unity to develop *ZeroPutt*, a golf game integrated with a custom hardware device for gameplay.
- **JJSDK - Onsite and Remote:** Integrated a native plugin (originally used in Unity) into Unreal Engine 5 to connect and communicate with AR glasses.

UNITY DEVELOPER 03/2023 - 09/2023

Onsite and Remote

- **UXPON - Remote:** Programmed casual game projects; worked with Nakama to handle game login via Facebook and Google.
- **Unicorn Studio - Onsite:** Participated in the development of game products and outsourcing projects for the company; trained Unity interns; contributed to project estimation for clients.
- **Extreme VietNam - Onsite:** Developed casual game projects using Unity; created 3D apps; supported the design team in delivering final products to customers.

AIRSPPEEDER

10/2023 - 11/2023

Description: NFT airplane racing game project made directly with Australian customers

Technology: Unreal Engine 5, Hyperplay

Specific tasks:

- Develop metamask login + interaction with smart contract
- Implement API
- Develop UI for sign wallet, leaderboard
- Participate in bug fixing

SMART HAMMER**06/2021 - 06/2021**

Description: A casual game where players control a hammer to reach the finish line and smash objects along the way

Technology: Unity Engine

Specific tasks:

- Participate in the development process of core gameplay and ads flow
- Participate in the bug fixing process

Reference: <https://apkcombo.com/smash-hammer/jp.co.extreme.game.smashhammer/>

OMRON PROTOTYPE**04/2021 - 05/2021**

Description: Developing a prototype health monitoring application for OMRON's medical devices

Technology: Unity Engine

Specific tasks: Code demo phase 1 of the project.

SLIME ROYALE**12/2021 - 11/2022**

Description: NFT game in the form of a character card game

Technology: Unity Engine

Specific tasks:

- Participate in developing the core gameplay
- Develop the Nuturing, Gacha, Shop, My Slime features...
- Responsible for connecting to the API provided by the server
- Participate in bug fixing.

START VERSE**03/2022 - 05/2022**

Description: NFT project in the style of Grand Theft Auto

Technology: Client, Server Socket - Unity Engine, Mirror

Specific tasks:

- Responsible for developing the UI of the login screen, world selection, and character selection
- Develop the Quest system for the game as well as the client-server interaction
- Participate in editing animations

MIVERSE**05/2022 - 11/2022**

Description: NFT project with space-themed MOBA gameplay

Technology: Client, Server Socket - Unity Engine, Mirror

Specific tasks:

- Participate in the development of core gameplay, login, ship selection, character selection.
- Develop client-server interaction and synchronization using Mirror
- Participate in the bug-fixing process

Description: An idle tycoon game that allows players to manage a medieval-themed supermarket

Technology: Unity Engine

Specific tasks:

- Analyze and design data.
- Participate in programming the core game (all features).
- Fix bugs.
